Circular (13) of 2020 **Additional Preventive Measures**

All Government Authorities and Departments

Greetings!

Further to Circular (10) regarding the precautionary measures to minimize the spread of epidemics and Circular (11) regarding the emergency remote work system issued on 05/03/2020 and as required by some government entities, please be advised of the following approved preventive measures:

1. Considering the possibility of postponing training programs and educational and professional gatherings to be held in the near future until the official announcement of ending the precautionary measures.
2. Allowing pregnant employees to fully or partially work from home given that work can be done remotely at the discretion of the government entity based on the possible level of exposure and provided that a medical certificate of pregnancy is provided without adversely affecting their work or entity's best interest.

Thanks for your cooperation!

Sincerely,

Dr. Mohammed Abdullatif Khalifa
General Manager
